Here at Ace we run fibre checks and colour testing on all our fibre and fabrics prior to choosing a cleaning method.

From hand knotted to machine tufted, modern to antique, viscose or synthetic your rugs will be like new again. We will collect your rug, deliver it to our rug spa where your rug will undergo a full inspection to determine the best way to wash the fibre.

Curtains we can freshen up on-site by dry cleaning or why not have them taken down? We can come along take down your beautiful curtains, swags and tails and take them to our in house dry cleaning facility, We will leave your curtains looking beautifully cleaned, pressed and dressed adding the finishing touches to your décor.

Ace Carpet Cleaners are the UK's only certified  **AQUADEFENCE** technicians.

 **AQUADEFENCE** are the market leaders in protective coatings. Ace have been looking for the best protection on the market and we have found it!

Utilising advanced nano technology to protect carpet, rugs, curtains and upholstery. The eco-friendly, non-toxic formula creates an easy clean protective coating that prevents damage from everyday spills and stains. The invisible barrier effectively repels liquid, mud, dirt and prevents alcohol, oil and water stains.

The unique formula bonds SiO_2 particles to the individual fibres of the surface at a nanometre level (roughly 500 times thinner than human hair)

COLOUR CORRECTION FOR CARPETS AND RUGS

Here at Ace we are specialists in bleach spot repairs and Persian rug restoration.

Bleach spots and colour loss are very common problem in households and workplaces. Colour loss caused by bleach or other chemicals being spilled which results in unsightly faded spots. We are able to perfectly restore these spots regardless of the colour of your rug or carpet.

A sustainable alternative to nosings safer and more pleasing on the eye. Will also pass all council and health and safety regulations.

CASE STUDY

We had a call from a client within the construction industry who was recommended by a trusted manufacturer that supplied the carpet within the building. They had numerous rooms that had bleach spots and colour loss issues. The client sent us a sample of the carpet that was laid throughout the building. We managed to reduce down the bleach spots/colour loss on the sample so it could be passed. Please see an example in the images below. This managed to save the client 20k in replacement costs and was extremely time effective. We aim to save 70% of replacement costs.

RUG SPA

Rest assured great care and attention will be paid to your rug at our unique rug spa.

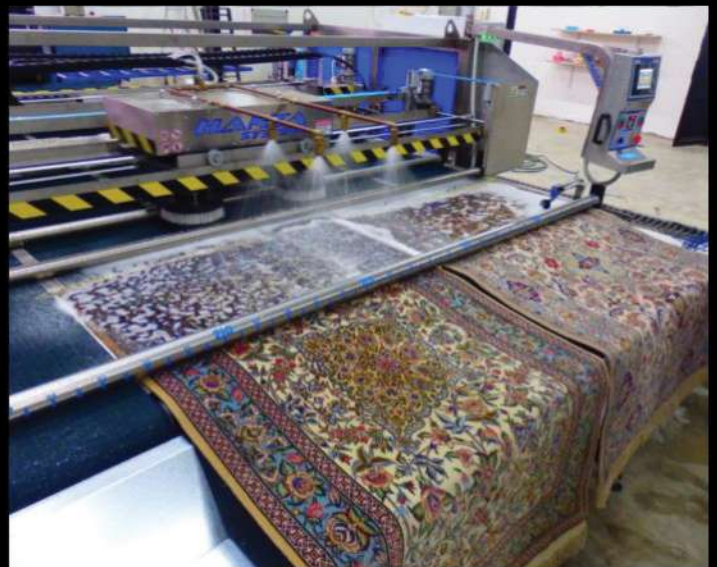

- We will come and collect your rug
- We inspect your rug to determine any pre-existing conditions or damage
- We test fibres to identify the correct method of cleaning
- We pre test for colour fastness
- If repairs are needed our dedicated team can repair at our facility

Your rug will be washed using the latest machinery. Enabling us to simulate an authentic river wash. Each spot is hand treated, fringes washed back to life by hand, then dried in our climate controlled drying room.

Once your rug is fully dried it will then be rolled with acid free tissue paper and placed in plastic tubing ready to be delivered back and reinstalled back to where you would like it placed.

Say goodbye to ugly, outdated and impractical colours. We can change the colour of your whole rug or carpet or even add borders, shapes and other designs to your carpets. Why not dye a runner to stairs, hallways and other high traffic areas?

Persian and oriental rugs are our speciality. There are only a few companies around the world that can perform intricately detailed colour restorations on Persian and oriental rugs. These rugs tend to be very susceptible to damage from sun fading. We utilise custom air bush equipment that we have specifically developed for this fascinating art.
